# PAINTWORKS READYMADE FRAMES

Made in our own workshop, our readymades are extremely popular, enabling artists to frame their work to professional standards whilst keeping the cost down by finishing and fitting the frames themselves.

The corners of our readymades are both glued and pinned rather than just pinned as most readymades are - this gives a much better corner joint. Once you have fitted your picture, we recommend that you tape the back of your frame with gumstrip which will make it much more secure and robust.

We often have a variety of readymade frames that are not stock items:~ made from barewood mouldings, glued & pinned and supplied with glass and boards. These are made with end of line mouldings or batch remnants and as such are not repeatable but they do offer excellent value.

## BESPOKE FRAMING

Our professional in-house framing department offers a complete service to anybody requiring bespoke, readymade or kit frames. In addition we sell an extensive range of framing materials and fittings. More information is available on our website: [www.paintworks.biz](http://www.paintworks.biz)
