**WELCOME TO PAINTWORKS PRICE LIST****NEW EVEN LOWER PAINT PRICES AT PAINTWORKS.**

When we set up Paintworks it was with the intention of providing the artists of the East End with the art shop of their dreams, the best products at the best prices in a friendly, informed atmosphere.

A couple of decades have passed since then and whilst our range of materials has grown and we now have customers all over the country we are aware that there are other ways of buying art materials out there.

The perception of shopping in warehouses, big mail order catalogues and online is that it is cheap and, of course, sometimes it is (but don't always believe it's half price just because it says so).

We believe that our materials are the best, we hope you like the atmosphere and the service you find at Paintworks and now we'd like you to compare our paint prices again and realise that you don't have to choose between old fashioned friendly helpful service and cheapest prices.

**AT PAINTWORKS YOU CAN HAVE IT ALL.**

**PRICE LISTS ON THE WEBSITE**

We are not exact computer wizards here at Paintworks but we are very enthusiastic about the materials we sell and welcome every opportunity to show them to our customers. We are also aware of our environmental responsibilities and see our website as a great way to provide more information about our range – including pictures, our opinions about them and prices – without printing thousands of paper catalogues every year and adding to the mail mountain. We have tried to include ALL of our materials in the PDF price lists which you can access on our site under RESOURCES and regularly change the special offers and add to the “what's new” section. In this way we endeavour to offer ALL of our customers and not just those who live close by the products we sell at the SAME PRICES. In fairness this means that we charge carriage at what it costs so that everybody is treated equally.

We urge you to use our online price lists but we know that not everybody can do this and will continue to produce our abridged version to post out.

**OPENING HOURS**

Monday to Saturday  
 9:30am to 5:30pm

Friday open late  
 until 6:30pm

**NEW PRODUCTS**

Since we printed our 2007 price list we have added many new products.

Our new Gallery stretchers have proved extremely popular and, encouraged by the thought that artists are returning to making their own canvasses, we have sourced a really good new 15oz cotton duck. This has had to be made for us as we were dissatisfied with what was available – we think we now have the best heavyweight canvas on the market. Having maintained our extremely cheap price on Talens Gesso, Paintworks is definitely a good place to start if you make your own canvasses.

We've improved our printmaking section with Permaset Aqua screen printing inks from Australia which are brilliant on t-shirts – the “super cover” ones will print on black in one coat and barely affect the softness of the fabric. Plus we have screens and squeegees. Have a look at our craft paint section for new fabric paints, pens and sprays.

Unable to resist artists' papers and pads we now have Saunders Waterford in 638g with a lovely smooth Hot Press surface, Khadi hand made coloured papers in stationery sizes plus quite a few new watercolour and drawing pads and books. Try these with our new lightfast, waterproof Pitt Artists' Pens in black, sepia and sanguine.

**SAVE MONEY WITH OUR DISCOUNTS**

The discounted prices indicated by PWP (or Paintworks Price) are achieved by negotiation and buying methods and never by a drop in quality. Our price list boasts some of the finest paints in the world.

In addition to the discounts given with PWP (Paintworks Prices), we have highly competitive quantity rates on paper and canvas. All other materials are subject to a 10% discount when you spend over £130 or 15% discount if your order exceeds £270.

We value our mail order customers and offer them the same good service, choice and prices as our shop customers. We will send practically anything we sell (there are certain restrictions on aerosols and inflammables) and charge carriage at what it costs us.

If any materials you buy from us are found to be faulty we will refund or replace them. If you wish to return perfect goods complete with purchase receipt we will exchange them or give you a credit note. In fairness to all our customers we DO NOT take back paper (as even the most careful handling can cause slight damage) or pens and aerosols (as we cannot guarantee that they have not been used).

Our Mail Order Terms and Conditions can be found in the PDF version of our Mail Order Form.

# DRAWING PAPERS

Cartridges for drawing work usually have a very slight tooth, for heavier weights and different surfaces look at the watercolour papers which are also suitable for drawing on. All sizes are approximate.

## WHITESAND CARTRIDGE

A4

Our most popular cartridge for its all round performance and economy. Whitesand is available in light weight 100g, medium weight 140g and heavyweight 220g in a variety of sizes. It has an even texture, good whiteness and a matt finish. It is acid free and chlorine free. Whitesand is also available in our good value Paintworks Cartridge Pads and the very popular Project Books.

### PAPER ACIDITY

Acid in paper causes colour change, deterioration and ultimate destruction. It may be present in the raw material - e.g. untreated wood pulp or in the size. Increased awareness of this problem means that today most artists quality papers are acid-free (or Neutral pH).

Hand-made and mould-made papers will normally fall into this category but even machine-made wood pulp based papers can now be buffered to provide a cheaper alternative. For optimum strength and permanence select a rag paper.

## PRINTMAKING PAPERS

These papers usually have much less size on the surface to allow absorption of the ink but are internally sized to give strength (especially when dampened). Rag papers are particularly good for intaglio work where the paper is put under a lot of stress in printing. Watercolour papers are also suitable for many printmaking techniques. Drawing papers can be useful for proofing and very basic relief printing.

### SOMERSET

#### PAPER SIZING

Size is a glue which is added to paper to reduce its absorbency and alter its characteristics.

Watercolour papers normally have a hard size applied to the surface which prevents the colour from being soaked up by the paper and thus dulling the brilliance.

Internal sizing is usually preferable in a printmaking paper as it increases the strength of the sheet without greatly reducing the absorbency thus allowing more ink to be held by the paper without causing a build up on the surface.

Waterleaf papers contain no size at all - e.g. blotting paper. Such papers are favoured by printmakers who wish to build up many layers of colour. Care must be taken if this type of paper is to be dampened since it has no strength when wet.

# WATERCOLOUR PAPERS

## WATERCOLOUR PAPER

Usually strongly sized to support saturation with water and to keep the colour sitting on the surface which helps to keep its luminosity in 'aquarelles'

### RWS WATERCOLOUR PAPER

The paper of the Royal Watercolour Society. Made from a mixture of cotton and linen this paper is heavily sized for best performance with watercolour. Acid free, 4 deckles, white.

-----	-------------------	----------	-------

### Thick Kozo

52g	970mm x 9.1metres	per roll	86.99
-----	-------------------	----------	-------

### WEIGHT

The weight of paper is now usually described in gsm (grams per square metre) because it is a much simpler system than the old pound weight measurements. The figure indicates the weight which a sheet of paper one square metre in area would weigh - the higher the number the thicker the paper. Often paper is simply described by its grammage e.g. 190g Waterford

imperial	72lb	= 150gsm
	90lb	= 180gsm
	140lb	= 300gsm
	200lb	= 410gsm

### HP. NOT. ROUGH

These describe the surface of the paper.

HP

(or satin) means HOT PRESSED.

The paper is given a smooth surface by pressing between hot plates/rollers.

NOT

(or Fin, or CP) means NOT HOT PRESSED

and is a matt in-between surface with slight texture.

ROUGH

(or Torchon, or Ruvido)

is given a rough surface by drying in textured felts.

### PAPER FORMATION

The distinctive quality of hand-made papers ~ four deckles and a pleasingly irregular surface and thickness ~ makes them very appealing. Since they are expensive to produce they are generally made from good quality materials but it is no longer fair to assume that they are necessarily "better" papers. Mould-made papers are generally made from the same quality of raw material but the automated process greatly reduces the price of the finished item. Mould-made paper will have a slight direction to the grain and a more consistent sheet than hand-made - a plus when, for example, printing an edition.

Machine made paper is the most economical to produce and qualities vary enormously from high grade acid-free papers down to newsprint. There is a place in art materials for all three types but it helps to know how they differ.

# INDIAN PAPERS

Made in India this collection of papers combines the unique qualities of hand-made papers with very economical prices. Environmentally, Khadi makes use of recycled rags and renewable flowers and fibres.

**OPENING HOURS**

Monday to Saturday  
 9:30am to 5:30pm

Friday open late  
 until 6:30pm

Lightweight materials like tubes of paint and brushes are often cheaper by post.

Some heavy goods eg clay are prohibitively expensive to send.

Stretched canvases, papers and boards are better sent in multiples of a size rather than singly as the extra packaging needed for singles makes carriage more expensive

**TERMS AND CONDITIONS**

All prices include V.A.T. at the current rate of 20% where applicable.

Prices are correct at the time of printing this price list but they are liable to change without any notification and we reserve the right to charge the prices current at the time of receiving an order.

All orders must be paid for in full before they can be collected or despatched - payment may be made by cash, cheque, Switch, Access or Visa.

We cannot absolutely guarantee delivery times and failure of goods to arrive by a given time will not be deemed reason for non-acceptance of the goods.

Any damage or shortage in an order must be notified in writing within 7 working days of receipt of the order. Please retain all packaging until goods have been checked.

We will not accept returned goods unless we have been contacted prior to their despatch giving the reason for their return. The cost of returning damaged or faulty goods will be borne by Paintworks but we insist on the right to specify the means of shipment for return. For all other returns it will be the responsibility of the purchaser to pay for shipping and to ensure packaging is adequate for safe delivery. We recommend that you obtain proof of despatch.

Paintworks will not be held responsible for any loss, damage or inconvenience caused by the use of any items provided by Paintworks beyond the replacement of goods deemed to be faulty. At no time will Paintworks liability exceed the price paid for the items purchased. This does not affect your statutory rights
